2006	71	38	22
2007	70	44	13
2008	35	25	6
Total	753⁴	1769	864

¹ AIDS cases reported for SLVHD from 1983 through June 30, 2008. HIV injections reported for SLVHD from May 31, 1989 through June 30, 2008. HIV statistics do not include persons tested anonymously.

² Cases with more than one risk factor are tabulated only in the category listed first.

³ **"Undetermined"** refers to patients whose mode of exposure to HIV is unknown. This includes patients under investigation; patients who died, were lost to follow-up, or refused interview; and patients whose mode of exposure to HIV remains undetermined after investigation.

⁴ Total fluctuates as HIV infections become AIDS cases.

Percentages may not equal 100 because of rounding. All data is provisional.
